MICROMARKET REPORT

FIRST HALF 2011 JANUARY-JUNE

COLORADOMICROREPORTS.COM

GLOSSARY OF TERMS

Median Price:

A value that separates the upper half of prices from the lower half of prices. It can be interpreted like an average, however the extreme prices (high and low) don't hold undue influence.

Average Price

Determined by totaling the sales prices of all houses sold in an area and dividing that number by the number of homes.

Average Price per Square Foot:

The price of each property divided by their respective square footage then averaged across all properties sold in the area for a given time period.

Average Days on Market:

The number of days a listing is active before it is entered into "pending" status. Pending status is when an offer has been accepted by the seller but the transaction is not yet closed. Average days on market is derived by adding all the days on market of each listing and dividing by the number of listings.

Properties Sold:

The number of property transactions that closed and transferred ownership.
